

## EXCAVATOR FOCUSED. NO DISTRACTIONS.

#### **EXCAVATOR EXPERTS.**

At Hitachi, we don't get sidetracked building every kind of construction equipment. Instead, we build excavators. It's that kind of focus, combined with our legacy of innovative technology, that results in highly efficient, reliable and durable machines – the ZX250LC-6 and ZX300LC-6 are no exceptions.

Hitachi Dash-6 Excavators are purpose-built with productivity-boosting advantages. Front and center is a new, fuel-efficient EPA Final Tier 4 (FT4)/EU Stage IV Isuzu engine that meets rigid emission standards – no diesel particulate filter needed. Generous swing torque, dig force and lift capacity. Spacious cabs designed for operator comfort and productivity. Standard upperstructure handrails for added safety and accessibility. Easy-to-operate controls for smooth and responsive hydraulics. Highly efficient cooling systems. And simplified daily and periodic maintenance thanks to features like single-side ground-level filters and a battery disconnect switch. By not building everything...

WE COMPROMISE ON NOTHING.

## **TACKLE YOUR TOUGHEST JOBS.**

#### IT'S ALL ABOUT UPTIME.

Operators have come to expect smooth responsiveness and multifunction capability – and Dash-6 Excavators deliver. Our HIOS III hydraulic system perfectly balances engine performance with hydraulic flow. The hydraulic boost system and enhanced boom recirculation generate aggressive boom and arm speed — returning the arm to dig faster, so you can move more dirt in a day.

The ZX250LC-6 and the ZX300LC-6 combine power and finesse for maximum productivity on any job from site development to utility work. Choose from three work modes to fit the task. High Productivity (HP) delivers more power and faster hydraulic response. Power (P) delivers a balance of power and speed, plus fuel economy for normal operation. Economy (E) maximizes fuel efficiency while delivering an enhanced level of productivity.

Need even more? Choose from a wide variety of track widths, arm lengths, bucket sizes and teeth, high-flow auxiliary hydraulic packages and other options.

#### RELIABLE PRODUCTIVITY.

- The pressurized fuel system improves fuel injector operation, and the fuel recirculation system helps prevent fuel gelling in cold climates so you can maintain maximum productivity.
- It's not always about brute force. Unmatched metering and smooth multifunction operation provide plenty of finesse and precision, too.
- When the digging gets tough, just press the power-boost button and muscle through.
- Generous swing torque, digging force and lift capacity help keep you on schedule.

## ZX250LC-6 / ZX300LC-6

- Whatever your grade system, Topcon, Trimble or Leica, Hitachi offers a grade reference ready package that reduces installation time by half.
- Operators get maximum support from a sculpted mechanical-suspension high-back seat. Seat has 318 mm (I2.5 in.) of travel, sliding together or independent of the joystick console. For even more comfort, opt for the air-suspension heated seat.
- Optional cab and right-side boom lights provide extra illumination to extend your production.
- Automatic, high-velocity bi-level climate-control system with automotive-style adjustable louvers helps keep the glass clear, the cab comfortable and the operator productive.

## MAXIMUM COMFORT FOR MAXIMUM PRODUCTIVITY.

#### **KEEP YOUR OPERATORS COMFORTABLY PRODUCTIVE.**

Operators are set for success inside our spacious, well-appointed cabs. Silicone-filled cab mounts isolate the operator from noise and vibration. A refined, multifunction LCD monitor employs a rotary control that makes it quick and simple to tap into a wealth of performance and convenience functions and features. Operators will also appreciate the wide entryway, fully adjustable high-back sculpted seat, lots of storage and generous legroom. As always, unsurpassed visibility, ergonomically placed loweffort joysticks, a highly efficient HVAC system, plus other features allow your operators to be...

#### **COMFORTABLE, SAFE AND EFFICIENT.**

■ Multi-language LCD monitor and rotary dial provide intuitive access to machine info and functions. Just turn and tap to select work modes, monitor maintenance intervals, check diagnostic codes and set cab temperature. Control oil flow and toggle between dig and thumb modes with a programmable thumbattachment mode.

Ergonomically correct shortthrow pilot levers provide smooth,
precise control with less effort.
Pushbuttons in the right lever allow
control of auxiliary hydraulic flow
for attachments. Optional sliding
switch provides proportional speed
control, giving you full command
from your fingertips.

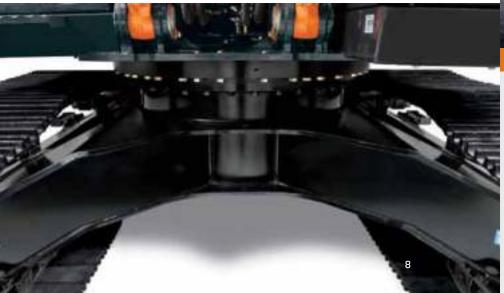

■ Get unobstructed all-around visibility thanks to a new hood design paired with a wide expanse of front, side, and overhead glass and mirrors.

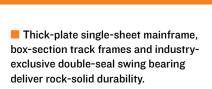

## RELIABILITY STARTS WITH DURABILITY.

#### **ROCK-SOLID PERFORMANCE.**

When you've got places to go and deadlines to meet, you want dependable equipment like the ZX250LC-6 and ZX300LC-6. Built to deliver unsurpassed uptime, they're armed with everything you need — and more. D-channel side frames house and protect the highly efficient coolers and FT4/Stage IV Isuzu diesel engines. Toughness is built into the heavy-duty undercarriage, digging structures, and hydraulic and electrical components. Welded bulkheads within the boom resist torsional stress, and tungstencarbide thermal-coated arm surfaces and oil-impregnated bushings further increase durability. Booms, arms and mainframes are so tough, they're warranted for three years or I0,000 hours, whichever comes first. Add it all up and our Dash-6 Excavators are your...

### **BEST LONG-TERM WORKHORSES.**

- Our field-proven technology is simple and efficient, employing cooled exhaust gas recirculation (EGR), a diesel oxidation catalyst (DOC) and selective catalytic reduction (SCR). An improved piston design allows particulate matter to be burned in cylinder, so there's no need for a diesel particulate filter (DPF).
- With large idlers, rollers and strutted track links, the sealed and lubricated undercarriage is built for the long haul.
- A redesigned boom and arm and larger hydraulic pumps make the ZX300LC-6 even tougher.
- Reinforced D-channel side frames provide maximum cab and component impact protection.
- Tungsten-carbide coated wear surfaces protect the critical bucket-to-arm joint.
- Oil-impregnated bushings enhance durability and extend lube intervals to 500 hours for the arm-and-boom joint and 100 hours for the bucket joint.

### ZX250LC-6 / ZX300LC-6

- Upperstructure handrails provide added safety when servicing the engine compartment, and a larger hood gives you better engine accessibility.
- Auto-idle, which reduces engine speed when hydraulics aren't in use, and auto-shutdown contribute to fuel efficiency.
- A battery disconnect switch, located in the rear door behind the cab, is easily accessible and extends battery life.
- The FT4 engine solution does not require a diesel particulate filter (DPF), saving service time and lowering operating costs.

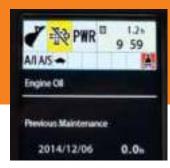

## MINIMIZE MAINTENANCE. MAXIMIZE UPTIME.

#### **DEFEAT DOWNTIME.**

From the convenient handrails that provide easy engine access to the centralized lube banks — the ZX250LC-6 and ZX300LC-6 are loaded with time- and money-saving advantages. Grouped service points make quick work of the daily routine. Productivity is maximized with 500- and 5,000-hour engine and hydraulic oil-service intervals. And easy-to-check sight gauges and fluid reservoirs, quick-change remote-mounted filters, and convenient fluid-sample ports minimize downtime for periodic maintenance. Scheduled maintenance is easy to track using ZXLink<sup>TM</sup> and the in-cab diagnostic monitor. Pair these features with a dealer-customized Ultimate Uptime package, and you get...

**OPTIMIZED OPERATION.** 

■ Easy-to-navigate LCD monitor issues scheduled maintenance alerts and diagnostic information. Additionally, the hydraulic temperature gauge on the monitor screen helps prevent downtime.

Centralized lube banks place zerks within easy reach, making greasing less messy and timeconsuming.

■ Engine oil, fuel and hydraulic pilot oil filters are all located on the same side at ground level for easy servicing.

### **ZX250LC-6 SPECS**

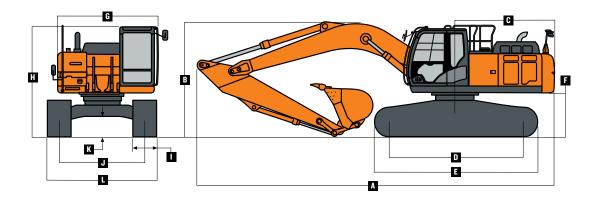

## **ZX250LC-6**

| Facility  | 7705010.0   |  |  |  |

#### Buckets ZX250LC-6

A full line of buckets is offered to meet a wide variety of applications. Digging forces are with power boost. Buckets are equipped with ESCO teeth standard. Replaceable cutting edges and a variety of teeth are available through dealer parts. Optional side cutters add I50 mm (6 in.) to bucket widths. Capacities are SAE heaped ratings.

<sup>\*</sup>Contact your Hitachi dealer for optimum bucket and attachment selections. These recommendations are for general conditions and average use. Does not include optional equipment such as thumbs or couplers. Larger buckets may be possible when using light materials, for flat and level operations, less compacted materials, and volume loading applications such as mass-excavation applications in ideal conditions. Smaller buckets are recommended for adverse conditions such as off-level applications, rocks, and uneven surfaces. Bucket capacity indicated is SAE heaped.

<sup>\*</sup>Contact your Hitachi dealer for optimum bucket and attachment selections. These recommendations are for general conditions and average use. Does not include optional equipment such as thumbs or couplers. Larger buckets may be possible when using light materials, for flat and level operations, less compacted materials, and volume loading applications such as mass-excavation applications in ideal conditions. Smaller buckets are recommended for adverse conditions such as off-level applications, rocks, and uneven surfaces. Bucket capacity indicated is SAE heaped.

 Machine Information Center (MIC)

(4 in.) adjustable armrests

Deluxe suspension cloth seat with 100-mm

(3) / Travel modes (2 with automatic shift) / Work mode (I) Multifunction, color LCD monitor with: Diagnostic capability / Multiple-language capabilities / Maintenance tracking / Clock / System monitoring with alarm features: Auto-idle indicator, engine air cleaner restriction indicator light, engine check, engine coolant temperature indicator light with audible alarm, engine oil pressure indicator light with audible alarm, lowalternator-charge indicator light, low-fuel indicator light, low DEF indication with audible alarm, fault code alert indicator, fuel-rate display, wipermode indicator, work-lights-on indicator, and work-mode indicator

Auxiliary hydraulic control switches in right console lever

 Motion alarm with cancel switch (conforms to SAE J994)

Power-boost switch on right console lever

Propel pedals and levers

SAE 2-lever control pattern

Seat belt, 51 mm (2 in.), retractable

Tinted glass

Transparent tinted overhead hatch

Hot/cold beverage compartment

▲ Air-suspension heated seat

Hydraulic oil filter restriction indicator light

▲ Protection screens for cab front, rear, and side

Seat belt, 76 mm (3 in.), non-retractable

▲ Window vandal-protection covers

#### Electrical

50-amp alternator

Battery disconnect switch

Blade-type multi-fused circuits

Positive-terminal battery covers

 ZXLink™ wireless communication system (available in specific countries; see your dealer for details)

Rearview camera

Cab extension wiring harness

#### Lights

 Work lights: Halogen / I mounted on boom / I mounted on frame

2 lights mounted on cab / I mounted on right side of boom

See your Hitachi dealer for further information.

Net engine power is with standard equipment including air cleaner, exhaust system, alternator, and cooling fan, at test conditions specified per ISO 9249. No derating is required up to 3050-m (10,000 ft.) altitude. Specifications and design subject to change without notice. Wherever applicable, specifications are in accordance with SAE standards. Except where otherwise noted, these specifications are based on units with 1370-mm (54 in.) buckets, full fuel tanks, and 79-kg (175 lb.) operators; a ZX250LC-6 unit with 5600-kg (12,346 lb.) counterweight and 800-mm (32 in.) triple semi-grouser shoes; and a ZX300LC-6 unit with 5600-kg (12,346 lb.) counterweight and 800-mm (32 in.) heavy-duty triple semi-grouser shoes.
